To whom it may concern,

As a truck driver, the XM Instant Traffic & weather is an extremely important tool in I use daily. It is used to plan my trips and to alert me of any problems that may occur. I can not only here what's going on around my immediate area but also what kind of weather i can expect 500-600 miles away.

If the NAB cannot see the positive impact that the XM Traffic & weather has on countless other truck drivers, than I don't think they have the consumer in mind when it comes to the actions they are taking.

I strongly urge the FCC to reject the NAB's petition 04-160.

Sincerely,

A proud trucker who does his part to deliver America's future.
